## PERSON

---

I am a 29-year-old developer, with a solid education background. I have an EUD (5,5 Years) and an HTX (3 Years). During my EUD I had elective subjects like Machine Learning, User Interface Design and Core Applications. My HTX was focused on Game Development and took me through Game Design, Communications, Technology and Electronics – At the latest I took a course on Full Stack Development with Norwegian tutors through Experis Academy

---

In my spare time I have coached Esports for the largest Esports General organisation in the country – The goal was primarily to teach young people how to be disciplined, behave well, and to provide an environment for professional growth, while allowing them to express themselves among peers with similar interests – Throughout this experience I have seen explosive growth in personalities and competences, among hundreds of young people.

I love keeping track of the latest in technology and the various languages that I focus on in programming, and I have a passion for music, equipment and musical instruments – Which has also led me to festivals and concerts in various countries such as The Netherlands

## EXPERIENCE

---

Fullstack Web Developer, .Net  
ITPilot ApS

2024 – 2025

Itpilot is a Danish software development and consulting firm. During my time with itpilot, I was tasked with maintaining and developing multiple different projects, specifically for their .Net focused team. The projects ranged from ASP.Net/Umbraco Web applications to React/.Net Web applications and the CICD that came with them. The main focus was on the Apromas project, an application that facilitates communication between bodyshops and paintshops

### Primary Focus

- React 15.6
- Umbraco
- Razor Pages
- ASP.Net

*SEGES Innovation* er en uafhængig, non-profit forsknings- og innovationsvirksomhed – I forbindelse med min ansættelse hos Seges, har jeg hjulpet med at udvikle deres Cropmanager og Tracelt platforme, som er banebrydende web applikationer bygget på Angular, for at hjælpe landbruget med udregninger/problemstillinger, doseringer ved hjælp af Machine Learning og Seges' egen forskning.

Opgaver har varieret fra refaktorering af hundredevis af filer, til implementering af proprietære biblioteker, code review og styling af komponenter baseret på professionelle designs i Figma.

Seges Innovation is an independent, non-profit research and innovation firm – During my time with Seges, I was primarily tasked with maintaining and developing their Cropmanager and Tracelt, their groundbreaking web applications built on Angular 14 and Angular 17, with a BFF to back them up and communicate with the API.

The tasks varied from refactoring hundreds of files, to implementing proprietary libraries, code review and styling of components, based on Figma projects by professional designers

#### Primary Focus

- Angular 14/15/16/17
- TypeScript
- Luxon
- .Net Web API

While I was at Experis, I was tasked with helping Seges Innovation with their Frontend needs and potentially also Backend tasks in their Fullstack solution. The intention of Experis was to provide a Fullstack .Net course and then serve as a consultant to a customer

#### Primary Focus

- Angular 13/14/15
- React
- C#
- .Net Web API

During my time with KKPartner A/S I was tasked with starting their Programming department inside of the IoT department, and to bring their workers into a more digitalized working environment. Tasks ranged from specific simple solutions with simple HTML, to Fullstack solutions that solved complex issues, in connection with Smart House technology

#### Primary Focus

- Frontend – React / React Native / NextJS
- Backend – Prisma / Express
- Database – MySQL, DigitalOcean DB Cluster
- OIOUBL/XML
- .Net/WPF
- .Net/Xamarin

Additionally I was tasked with tutoring another student in the same field as myself

## EDUCATION

## PERIOD

---

### Datatekniker, Programming | EUD

2017-2022

- Machine Learning (Valgfag)
- User Interface Design (Valgfag)
- Core Applications (Valgfag)

### Gymnasiet Uddannelse | HTX

2013-2016

- Matematik A
- Dansk A
- Engelsk A
- El-Teknologi A
- Kommunikation/IT A
